

1 List of Pictures

<i>Picture 1: Amplitude Shift Keying (ASK)</i>	33
<i>Picture 2: Spectrum of an ASK with 100 Bd</i>	33
<i>Picture 3: Oscilloscope display of an ASK</i>	34
<i>Picture 4: Frequency Shift Keying (FSK)</i>	34
<i>Picture 5: Spectrum of a FSK</i>	34
<i>Picture 6: Spetrum of a CPFSK with 100 Bd</i>	35
<i>Picture 7: Spectrum of a DFSK</i>	36
<i>Picture 8: IQ Plot of C4FM</i>	36
<i>Picture 9: Sonagram and spectrum of C4FM in idle mode</i>	37
<i>Picture 10: Minimum Shift Keying</i>	38
<i>Picture 11: Spectrum of a Tamed Frequency Modulation (TFM 3) with 100 Bd</i>	38
<i>Picture 12: Spectrum of a MFSK with 12 tones</i>	39
<i>Picture 13: Phase shift Keying</i>	40
<i>Picture 14: BPSK-A</i>	40
<i>Picture 15: Phase plane of a BPSK</i>	41
<i>Picture 16: Spectrum of a BPSK with 600 Bd</i>	41
<i>Picture 17: BPSK-B</i>	41
<i>Picture 18: QPSK-A</i>	42
<i>Picture 19: QPSK-B</i>	43
<i>Picture 20: Spectrum of a QPSK with 600 Bd</i>	43
<i>Picture 21: Phase plane of a QPSK</i>	43
<i>Picture 22: Phase plane of a OQPSK (right) compared to QPSK (left)</i>	44
<i>Picture 23: Phase Plane of 8PSK</i>	45
<i>Picture 24: Spectrum of a 8PSK with 600 Bd</i>	46
<i>Picture 25: Example of an 8QAM and 16QAM in the Phase Plane</i>	47
<i>Picture 26: Spectrum of a QAM8 with 600 Bd</i>	48
<i>Picture 27: Spectrum of a QAM16 with 600 Bd</i>	48
<i>Picture 28: Comparison of FDM and OFDM</i>	49
<i>Picture 29: Spectrum of OFDM with 45 channels</i>	49
<i>Picture 30: Function of DSSS</i>	50
<i>Picture 31: Function of FHSS</i>	51
<i>Picture 32: Different types of amplitude modulation</i>	52
<i>Picture 33: Quantization in a PCM</i>	53
<i>Picture 34: Delta Modulation</i>	54
<i>Picture 35: Common data formats</i>	58
<i>Picture 36: Principle of FDMA</i>	75
<i>Picture 37: Principle of TDMA</i>	75
<i>Picture 38: Principle of OFDMA</i>	76
<i>Picture 39: The OSI reference model</i>	77
<i>Picture 40: STANAG 5066 layers</i>	82
<i>Picture 41: Spectrum of an AFS navy modem</i>	117
<i>Picture 42: Spectrum of ALE400</i>	118
<i>Picture 43: Expanded spectrum of ALE400</i>	118

<i>Picture 44: Spectrum of an ALIS signal</i>	119
<i>Picture 45: ALIS link setup procedure</i>	120
<i>Picture 46: Spectrum of ARD9800-OFDM</i>	122
<i>Picture 47: Spectrum and Sonagram of ARD9800-OFDM</i>	122
<i>Picture 48: Spectrum of an ARQ-E signal with 288 Bd</i>	123
<i>Picture 49: Spectrum of ARQ-E3 in idle mode</i>	124
<i>Picture 50: ARQ-E3 – Signal Structure</i>	124
<i>Picture 51: Typical spectrum of an ARQ-M4</i>	126
<i>Picture 52: Spectrum of ARQ-SWE</i>	128
<i>Picture 53: Spectrum of an ARQ 6-90</i>	130
<i>Picture 54: Oscilloscope display of ARQ 6-90</i>	130
<i>Picture 55: Spectrum of AUM 13 signal</i>	132
<i>Picture 56: Spectrum of AUTOSPEC with 75 Bd</i>	133
<i>Picture 57: AUTOSPEC – Signal Structure</i>	133
<i>Picture 58: Spectrum of a 150 Bd Baudot signal</i>	134
<i>Picture 59: Baudot signal in the oscilloscope display</i>	134
<i>Picture 60: Bit correlation of a Baudot signal</i>	135
<i>Picture 61: Hell display of a Baudot signal</i>	135
<i>Picture 62: Spectrum of the Russian Baudot-ARQ system</i>	137
<i>Picture 63: Spectrum of Baudot F7B with 50 Bd</i>	138
<i>Picture 64: Sonagram of Baudot F7B</i>	138
<i>Picture 65: Spectrum of Baudot Sync</i>	139
<i>Picture 66: Baudot sync display speed in relation to bit</i>	139
<i>Picture 67: Spectrum of a CIS 36-50 signal</i>	140
<i>Picture 68: Spectrum of a BR6028 signal</i>	141
<i>Picture 69: Spectrum of BUL 107.53 Bd</i>	143
<i>Picture 70: Spectrum of CHN MIL 4FSK 500 Hz variant</i>	145
<i>Picture 71: Spectrum of CHN MIL 4FSK 400 Hz variant</i>	146
<i>Picture 72: Sonagram of CHN MIL 4FSK 500 Hz variant</i>	146
<i>Picture 73: Spectrum of CHN MIL 8FSK</i>	147
<i>Picture 74: Sonagram of CHN MIL 8FSK</i>	147
<i>Picture 75: Sonagram of CHN MIL Hybrid modem</i>	148
<i>Picture 76: 8FSK preamble for CHN MIL Hybrid modem</i>	148
<i>Picture 77: PSK preamble for CHN MIL Hybrid modem</i>	149
<i>Picture 78: Spectrum of MFSK 4+4 signal</i>	150
<i>Picture 79: Spectrum of a CHIP64 signal</i>	151
<i>Picture 80: Phase plane of a CHIP signal</i>	151
<i>Picture 81: Phase spectrum of a CHIP 64 signal</i>	152
<i>Picture 82: Phase oscilloscope display of a CHIP 64 signal</i>	152
<i>Picture 83: Spectrum of CIS-11</i>	153
<i>Picture 84: CIS12/MS5 spectrum with reference tone</i>	154
<i>Picture 85: CIS 20 spectrum with reference tone</i>	154
<i>Picture 86: CIS 20 sonagram</i>	154
<i>Picture 87: Spectrum of CIS 14 with 96 Bd and 1000 Hz shift</i>	155
<i>Picture 88: Auto correlation display of CIS 14 with ACF at 14 bit</i>	155

<i>Picture 89: Spectrum of CIS 150 Bd selcall</i>	<i>156</i>
<i>Picture 90: Spectrum of CIS 16x75 Bd</i>	<i>157</i>
<i>Picture 91: Phase plane of one channel</i>	<i>157</i>
<i>Picture 92: Spectrum and sonagram of CIS 16x75 Bd</i>	<i>158</i>
<i>Picture 93: Spectrum of a CIS 36-50 in idle condition</i>	<i>159</i>
<i>Picture 94: Spectrum of CIS 50-17 Baudot FROST2</i>	<i>161</i>
<i>Picture 95: HELL display of CIS 50-17 Baudot FROST2</i>	<i>161</i>
<i>Picture 96: Auto correlation function (ACF) of CIS 50-17 Baudot FROST2</i>	<i>161</i>
<i>Picture 97: Spectrum of a CIS 50-50 in idle condition</i>	<i>162</i>
<i>Picture 98: Oscilloscope display of a CIS 50-50 in idle condition</i>	<i>162</i>
<i>Picture 99: Typical spectrum of an 8181 signal with 500 Hz shift</i>	<i>164</i>
<i>Picture 100: Spectrum of CIS 500 FSK burst</i>	<i>165</i>
<i>Picture 101: Sonagram of CIS 500 FSK burst</i>	<i>165</i>
<i>Picture 102: Spectrum of CIS 1280 Bd modem</i>	<i>166</i>
<i>Picture 103: Phase Plane of CIS 1280 Bd modem</i>	<i>166</i>
<i>Picture 104: Spectrum of CIS 1200 Bd modem</i>	<i>168</i>
<i>Picture 105: Spectrum of MFSK-20</i>	<i>169</i>
<i>Picture 106: Sonagram of MFSK-20</i>	<i>169</i>
<i>Picture 107: spectrum of a CIS 45 tone OFDM</i>	<i>170</i>
<i>Picture 108: Spectrum of a CIS 60 tone OFDM</i>	<i>170</i>
<i>Picture 109: Spectrum of a CIS 93 tone OFDM</i>	<i>171</i>
<i>Picture 110: Spectrum of CIS 93 tone OFDM shifted by 550 Hz</i>	<i>171</i>
<i>Picture 111: Spectrum of the Clansman FSK modem</i>	<i>172</i>
<i>Picture 112: Spectrum of a CLOVER signal</i>	<i>173</i>
<i>Picture 113: Sonagram of a CLOVER signal</i>	<i>174</i>
<i>Picture 114: Spectrum of Clover in 8P2A mode</i>	<i>177</i>
<i>Picture 115: Spectrum of CODAN</i>	<i>180</i>
<i>Picture 116: Spectrum of CODAN chirp selcall</i>	<i>181</i>
<i>Picture 117: Spectrum of CODAN Selcall</i>	<i>182</i>
<i>Picture 118: Example of Coquelet-8 decoding</i>	<i>184</i>
<i>Picture 119: MFSK Coquelet-8 signal</i>	<i>185</i>
<i>Picture 120: Spectrum of Coquelet 100 with 16.7 Bd</i>	<i>187</i>
<i>Picture 121: Spectrum of Coquelet 13</i>	<i>188</i>
<i>Picture 122: Spectrum of CROWD 36</i>	<i>189</i>
<i>Picture 123: Crowd 36 in sonagram display</i>	<i>190</i>
<i>Picture 124: Spectrum of CROWD 36 selective calling</i>	<i>191</i>
<i>Picture 125: Sonagram of CROWD 36 selective calling</i>	<i>191</i>
<i>Picture 126: Spectrum of a DGPS signal with 100 Bd</i>	<i>194</i>
<i>Picture 127: Spectrum of DominoEX with 4 Bd</i>	<i>200</i>
<i>Picture 128: Spectrum of DominoEX with 11 Bd</i>	<i>201</i>
<i>Picture 129: Spectrum of DominoEX with 22 Bd</i>	<i>201</i>
<i>Picture 130: Spectrum of DPRK FSK in ARQ mode</i>	<i>202</i>
<i>Picture 131: Sonagram of DPRK FSK in ARQ mode</i>	<i>202</i>
<i>Picture 132: Different sonagram of DPRK FSK in ARQ mode</i>	<i>202</i>
<i>Picture 133: Spectrum of DPRK FSK 600 FEC</i>	<i>203</i>

<i>Picture 134: Spectrum of DRM-OFDM</i>	<i>204</i>
<i>Picture 135: Spectrum of WinDRM.....</i>	<i>208</i>
<i>Picture 136: Spectrum of DUP ARQ.....</i>	<i>209</i>
<i>Picture 137: Spectrum of MAHRS with 2400 Bd.....</i>	<i>213</i>
<i>Picture 138: Spectrum of FARCOS mode</i>	<i>214</i>
<i>Picture 139: Phase spectrum of FARCOS with peaks at 1800 Hz</i>	<i>214</i>
<i>Picture 140: Spectrum of F7B 195.3 Bd.....</i>	<i>216</i>
<i>Picture 141: Sonagram of F7B 195.3 Bd</i>	<i>216</i>
<i>Picture 142: Spectrum of a FAX transmission</i>	<i>217</i>
<i>Picture 143: Typical picture of a FAX transmission.....</i>	<i>218</i>
<i>Picture 144: Spectrum of a FEC-A with 192 Bd</i>	<i>221</i>
<i>Picture 145: FEC-A with raw decoding</i>	<i>222</i>
<i>Picture 146: Spectrum of a G-TOR signal with 300 Bd</i>	<i>225</i>
<i>Picture 147: Sonagram of a G-TOR signal.....</i>	<i>225</i>
<i>Picture 148: Spectrum of GW Single Tone Modem.....</i>	<i>227</i>
<i>Picture 149: Phase Plane of GW Single Tone Modem.....</i>	<i>227</i>
<i>Picture 150: Sonagram GW Multi Tone Modem with 30 tones.....</i>	<i>228</i>
<i>Picture 151: Spectrum of DSSTV</i>	<i>231</i>
<i>Picture 152: Sonagram of DigiTRX with embedded callsign.....</i>	<i>231</i>
<i>Picture 153: Spectrum of a typical Hell signal</i>	<i>232</i>
<i>Picture 154: Spectrum of a HF DL signal.....</i>	<i>235</i>
<i>Picture 155: Sonagram of a HF DL signal with sub-carrier of 1440 Hz.....</i>	<i>235</i>
<i>Picture 156: Framing of HF DL.....</i>	<i>236</i>
<i>Picture 157: Oscilloscope display of HNG-FEC.....</i>	<i>239</i>
<i>Picture 158: Typical spectrum of ANNEX 10.....</i>	<i>240</i>
<i>Picture 159: Oscilloscope display of IRA-ARQ.....</i>	<i>241</i>
<i>Picture 160: Spectrum of IRA-ARQ with 600 Bd</i>	<i>241</i>
<i>Picture 161: Spectrum of IRN 207 Bd modem</i>	<i>242</i>
<i>Picture 162: Phase spectrum of IRN 207 Bd signal with peaks at 207 Bd.....</i>	<i>242</i>
<i>Picture 163: Phase plane of IRN QPSK 207 Bd modem.....</i>	<i>243</i>
<i>Picture 164: Sonagram of IRN QPSK 207 Bd.....</i>	<i>243</i>
<i>Picture 165: Spectrum of 1200 Bd FSK</i>	<i>244</i>
<i>Picture 166: Spectrum and Sonagram of 1200 Bd FSK.....</i>	<i>244</i>
<i>Picture 167: Spectrum of Italian MIL PSK 1200 Bd.....</i>	<i>245</i>
<i>Picture 168: Spectrum of Japan 8-tone ASK.....</i>	<i>246</i>
<i>Picture 169: Sonagram of Japan 8-tone ASK</i>	<i>246</i>
<i>Picture 170: Spectrum of Japan 16tone PSK.....</i>	<i>247</i>
<i>Picture 171: Sonagram of Japan 16tone PSK.....</i>	<i>247</i>
<i>Picture 172: Spectrum of the Japan 1500 Bd QPSK.....</i>	<i>248</i>
<i>Picture 173: Speed measurement of the Japan 1500 Bd QPSK.....</i>	<i>248</i>
<i>Picture 174: Phase constellation of the Japan 1500 Bd QPSK.....</i>	<i>248</i>
<i>Picture 175: Sonagram of Japan 32-tone OFDM</i>	<i>249</i>
<i>Picture 176: Sonagram of JT65 signal.....</i>	<i>250</i>
<i>Picture 177: Spectrum of a LINCOMPEX signal with two channels</i>	<i>251</i>
<i>Picture 178: Spectrum of LINEA Sitor</i>	<i>252</i>

<i>Picture 179: Spectrum of a LINK 11 transmission</i>	255
<i>Picture 180: Spectrum of the LINK 11 single Tone Modem</i>	258
<i>Picture 181: Sonagram of LINK 11 SLEW</i>	258
<i>Picture 182: Typical spectrum of a LINK 14 signal</i>	259
<i>Picture 183: Spectrum of Mazielka</i>	263
<i>Picture 184: Spectrum of MD 522 NB</i>	264
<i>Picture 185: Spectrum of a MD 522 WB</i>	264
<i>Picture 186: Spectrum of a MD 522 DIV</i>	265
<i>Picture 187: Sonagram and spectrum of a MD 522 DIV</i>	265
<i>Picture 188: Spectrum of MD 1061</i>	266
<i>Picture 189: Spectrum of MD 1142</i>	267
<i>Picture 190: Spectrum of MD 1280 with 75 Bd and 850 Hz shift</i>	268
<i>Picture 191: Spectrum of a MFSK-8 signal</i>	269
<i>Picture 192: Spectrum of a MFSK 16-signal</i>	270
<i>Picture 193: AFS Navy modem FSK preamble</i>	271
<i>Picture 194: Spectrum of South African Navy MFSK</i>	271
<i>Picture 195: Spectrum of MFSK BUL 8-Tone</i>	272
<i>Picture 196: Spectrum ALCATEL 801 for 300 Bd</i>	273
<i>Picture 197: Spectrum ALCATEL 801 for 150 Bd</i>	273
<i>Picture 198: Spectrum of a TADIRAN modem</i>	274
<i>Picture 199: Spectrum of TE-204 modem</i>	275
<i>Picture 200: Sonagram of a TE-204 modem</i>	275
<i>Picture 201: Spectrum of TT2300-ARQ</i>	276
<i>Picture 202: Spectrum of the YUG 20 tone system</i>	277
<i>Picture 203: Spectrum of a MIL STD 188-110A ser modem</i>	278
<i>Picture 204: Spectrum of 16 tone MIL STD 188-110A App A</i>	279
<i>Picture 205: Spectrum of MIL 188-110A 39 tone</i>	280
<i>Picture 206: Data block structure used for MIL STD 188-110B</i>	281
<i>Picture 207: Spectrum of a MIL STD 188-110 Appendix C in HDL mode</i>	282
<i>Picture 208: Spectrum of MIL STD 188-141A</i>	284
<i>Picture 209: Linking Protection in MIL STD 188-141A</i>	285
<i>Picture 210: 3G ALE BW3 LDL traffic data PDU's</i>	288
<i>Picture 211: 3G ALE BW4 LDL acknowledgement PDU's</i>	288
<i>Picture 212: Spectrum of 3G ALE</i>	288
<i>Picture 213: Spectrum of MIL STD 188-342</i>	290
<i>Picture 214: Spectrum of MT63</i>	291
<i>Picture 215: Spectrum of Nokia burst system with 150.6 Bd</i>	292
<i>Picture 216: Spectrum of Nokia burst system with 301.7 Bd</i>	292
<i>Picture 217: Spectrum of Nokia burst system with 602.14 Bd</i>	292
<i>Picture 218: Spectrum of NUM 13</i>	293
<i>Picture 219: Spectrum of an Olivia signal</i>	294
<i>Picture 220: Oliva in the MFSK oscilloscope</i>	295
<i>Picture 221: Spectrum of PACTOR I</i>	297
<i>Picture 222: Spectrum of PACTOR II</i>	298
<i>Picture 223: Spectrum of PACTOR II-FEC</i>	299

<i>Picture 224: Spectrum PACTOR III speed level 1</i>	<i>301</i>
<i>Picture 225: PACTOR III speed level 2</i>	<i>302</i>
<i>Picture 226: PACTOR III speed level 3</i>	<i>302</i>
<i>Picture 227: PACTOR III speed level 5</i>	<i>302</i>
<i>Picture 228: PACTOR III speed level 6</i>	<i>302</i>
<i>Picture 229: Spectrum of a Packet Radio signal.....</i>	<i>303</i>
<i>Picture 230: PANTHER-H synchronisation and frequency hops.....</i>	<i>304</i>
<i>Picture 231: PANTHER-H synchronisation bursts</i>	<i>305</i>
<i>Picture 232: PANTHER-H detailed view of one burst</i>	<i>305</i>
<i>Picture 233: Spectrum of PICCOLO MK VI.....</i>	<i>310</i>
<i>Picture 234: Multi-channel Piccolo</i>	<i>311</i>
<i>Picture 235: Spectrum of PICCOLO 12.....</i>	<i>312</i>
<i>Picture 236: Spectrum of a PSK31 signal.....</i>	<i>318</i>
<i>Picture 237: Phase plane of a BPSK PSK31 signal.....</i>	<i>318</i>
<i>Picture 238: Spectrum of PSK 63 in QPSK mode</i>	<i>319</i>
<i>Picture 239: Spectrum of PSK 125 in QPSK mode</i>	<i>320</i>
<i>Picture 240: Phase plane of PSKAM 10/31/50</i>	<i>322</i>
<i>Picture 241: Spectrum of PSKAM 10.....</i>	<i>322</i>
<i>Picture 242: Spectrum of PSKAM 31</i>	<i>323</i>
<i>Picture 243: Spectrum of PSKAM 50.....</i>	<i>323</i>
<i>Picture 244: Sonagram of Q15x25.....</i>	<i>324</i>
<i>Picture 245: Oscilloscope display of RAC-ARQ.....</i>	<i>325</i>
<i>Picture 246: Spectrogram of RFSM-2400 modem</i>	<i>326</i>
<i>Picture 247: Spectrum of Robust Packet Radio</i>	<i>327</i>
<i>Picture 248: Expanded spectrum of Robust Packet Radio.....</i>	<i>327</i>
<i>Picture 249: Spectrum of ROU-FEC.....</i>	<i>328</i>
<i>Picture 250: Spectrum of RS-ARQ II.....</i>	<i>330</i>
<i>Picture 251: Frame structure of the HF Modem GM2100.....</i>	<i>331</i>
<i>Picture 252: Spectrum of the HF Modem GM2100.....</i>	<i>331</i>
<i>Picture 253: Spectrum of RUS MIL voice scrambler with FSK lower/upper band.....</i>	<i>335</i>
<i>Picture 254: FSK oscilloscope of FSK carrier of the RUS MIL voice scrambler</i>	<i>335</i>
<i>Picture 255: Spectrum of Marconi 25tone</i>	<i>336</i>
<i>Picture 256: Spectrum and Sonagram of Marconi 25tone.....</i>	<i>336</i>
<i>Picture 257: Spectrum of Siemens CHX-200 modem.....</i>	<i>337</i>
<i>Picture 258: Spectrum of SITOR A.....</i>	<i>338</i>
<i>Picture 259: Timing of a SITOR A signal in the oscilloscope display</i>	<i>339</i>
<i>Picture 260: Spectrum of SKYFAX.....</i>	<i>340</i>
<i>Picture 261: Spectrum of a SSTV transmission calling CQ.....</i>	<i>343</i>
<i>Picture 262: Sonagram of STANAG 4197.....</i>	<i>346</i>
<i>Picture 263: Spectrum of a typical STANAG 4285 signal.....</i>	<i>348</i>
<i>Picture 264: Typical spectrum of a STANAG 4529 signal.....</i>	<i>353</i>
<i>Picture 265: Spectrum of Systeme 3000 FEC mode.....</i>	<i>358</i>
<i>Picture 266: Spectrum of TADIRAN AutoCall</i>	<i>359</i>
<i>Picture 267: Sonagram of TADIRAN AutoCall.....</i>	<i>359</i>
<i>Picture 268: Spectrum of a Tadiran signal</i>	<i>360</i>

<i>Picture 269: Spectrum with Sonagram</i>	360
<i>Picture 270: Spectrum of a TFM3 signal</i>	361
<i>Picture 271: Spectrum of a TFM5 signal</i>	361
<i>Picture 272: Typical Spectrum of Thorb</i>	362
<i>Picture 273: Spectrum of TMS-430 modem</i>	363
<i>Picture 274: Spectrum of a typical Twinplex signal</i>	365
<i>Picture 275: Typical spectrum of a VFT signal</i>	367
<i>Picture 276: Spectrum of VISEL</i>	368
<i>Picture 277: VISEL bit correlation</i>	368
<i>Picture 278 : Typical track of a chirpsounder</i>	375
<i>Picture 279: Oscilloscope display of a typical CODAR signal</i>	377
<i>Picture 280: Spectrum of a Datatrak signal</i>	378
<i>Picture 281: Spectrum of an EFR signal</i>	380
<i>Picture 282: Function of an Ocean Radar</i>	383
<i>Picture 283: Transmission of LORAN-C</i>	384
<i>Picture 284: Spectrum of a NAVTEX signal</i>	386
<i>Picture 285: Spectrum of a BCPSK signal of NDS200 DGPS</i>	387
<i>Picture 286: Phase spectrum of NDS200 DGPS signal with 100 Bd peaks</i>	388
<i>Picture 287: Phase plane of NDS200 DGPS signal</i>	388
<i>Picture 288: Over the horizon radar (OTHR)</i>	390
<i>Picture 289: French OTHR with 25ms pulses or 40 pulses per second (pps)</i>	391
<i>Picture 290: CIS OTHR ABM-2 with 100ms pulses or 10 pps</i>	391
<i>Picture 291: Cyprus OTHR with 20ms pulses or 50 pps</i>	391
<i>Picture 292: IRAN OTHR with 30ms pulses or 33 pps</i>	391
<i>Picture 293: OTHR SuperDARN with 25ms or 40 pps</i>	391
<i>Picture 294: Chirp OTHR with 20ms or 50 pps</i>	391
<i>Picture 295: Spectrum of a SuperDARN</i>	394
<i>Picture 296: Sonagram of a 7s operation of SuperDARN</i>	394
<i>Picture 297: Pulse sequence of a SuperDARN</i>	394

2 List of Tables

<i>Table 1: C4FM symbol table</i>	36
<i>Table 2: Bit value for QPSK</i>	42
<i>Table 3: Phase shifts for CQPSK</i>	44
<i>Table 4: Bit values for DQPSK</i>	46
<i>Table 5: Bit values for QAM</i>	47
<i>Table 6: Different description for data levels</i>	55
<i>Table 7: Code table for ITA2, ITA2P and ITA3</i>	67
<i>Table 8: Code table for CCIR476-4, HNG-FEC and PICCOLO MK VI alphabets</i>	69
<i>Table 9: ASCII table</i>	73
<i>Table 10: X.25 Packet frame</i>	84
<i>Table 11: Common used transmission modes</i>	96
<i>Table 12: Terms and their description</i>	97
<i>Table 13: Determination of necessary bandwidths for emissions</i>	105
<i>Table 14: Table of waveforms and possible user sorted by Baudrate</i>	116
<i>Table 15: Tone layout for ALE400</i>	118
<i>Table 16: ALIS 2 waveforms</i>	121
<i>Table 17: ARQ-S repetition cycle</i>	127
<i>Table 18: ARQ-SWE repetition cycle</i>	128
